Member of the research team

ORGANISATIONAL SKILLS

Leadership / coordination skills

These derive from the fact that I was responsible for coordinating a team of 9 people during the time I held a management position, and a team of 14 people within a project.

COMMUNICATION AND INTERPERSONAL SKILLS

Advanced communication skills

These skills were acquired through European funded projects where I was a member of the research teams. I actively participated in the multi-national meetings held within these projects, having an active role in the conversations and events that took place.

Communication skills were also developed during the activity of associate teaching staff.
